

EMBRACE THE MODERN WORKFORCE EMPOWERED BY AI.

Improving your workflow through collaboration with SMS and Copilot.

Microsoft Copilot for 365 is an AI-powered tool that enhances Microsoft 365, offering quick and exceptional results for project proposals, meeting summaries, and presentations.

Changing the way we work

In the modern workplace, as workloads increase, communication is consuming a significant amount of our time.

A Communication Upgrade

Microsoft 365 users receive over 250 emails daily, engage in 150 chats, and Teams meetings per person have tripled globally since 2022.

A Work Flow Enhancement

4x Faster

Of users were able to get caught up on a missed meeting nearly

The Rise of Artificial Intelligence

As some people speculate about an AI takeover, people who work with AI on a daily basis provide us with reassuring insights

87%

Of Workers in a Creative Role

Who are extremely familiar with AI said they'd be comfortable using AI for creative aspects of their job.

The strain of searching

Hunting for information for presentations, emails, and documents consumes a significant amount of employees' work time.

8 Minutes

Faster than none Copilot user

Microsoft compared 163 participants, 80 with Copilot and 83 without, in a task involving gathering information from various sources like files, emails, and calendars.

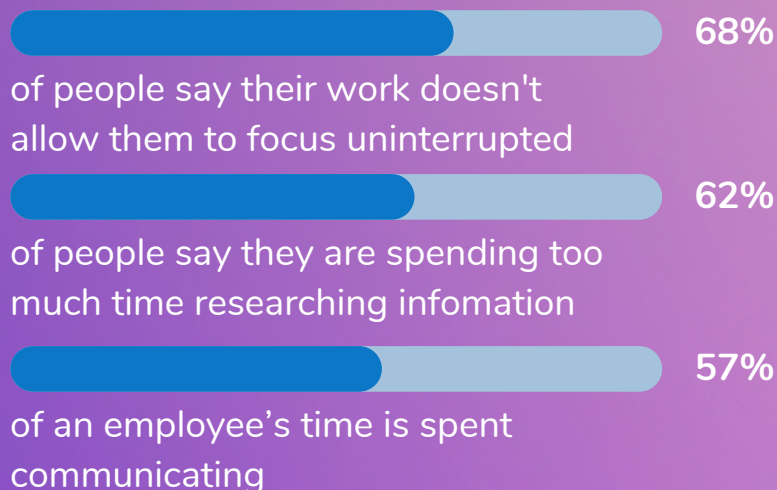

90 Minutes

On average is time saved, by Copilot users a week in researching/obtaining information based work tasks

We are unable to keep up with the pace of work.

Modern work has long awaited a significant improvement which demonstrates the importance of Copilots.

Work hours, workday length, and meeting durations have increased. Enhanced communication methods make staying informed easier but harder to manage. Time management challenges include lack of focused time, information retrieval needs, and high volumes of ongoing communications with associated opportunity costs.
