For over two decades, our UK-based experts have helped businesses stay secure, confident, and productive with clear, practical guidance across cloud and Microsoft 365.

Microsoft 365 Security Review

Take control of your organisation's security with a thorough assessment of your Microsoft 365 environment. We analyse admin roles, user permissions, guest access, and backup readiness to uncover hidden vulnerabilities and strengthen your defence. This review ensures only the right people have the right access, and that your critical data remains protected and recoverable.

Secure Score Assessment & Action Plan

Get a clear, simplified view of your current Microsoft 365 security posture. Our Secure Score review highlights strengths, exposes weak points, and delivers a prioritised action plan tailored to your business. You'll receive practical, achievable recommendations designed to elevate your protection and reduce risk across your entire environment.

MFA & Legacy Authentication

Modernise your authentication approach to dramatically reduce account-related risks. We help you enable robust multi-factor authentication and remove outdated legacy sign-in methods that attackers commonly exploit. The result: safer, more resilient user accounts and a more secure identity foundation for your business.

Anti-Spam & Anti-Phishing Assessment

Strengthen your frontline email security with fully optimised anti-phishing and anti-spam protection. Using the best of Office 365, Defender, and FutureSpam, we build robust, modern policies that block suspicious messages, reduce user risk, and safeguard your organisation against evolving threats.

£100 (ex VAT)

Email Authentication Setup (SPF, DKIM, DMARC)

Protect your business and ensure your emails reach customers with confidence. We implement industry-standard SPF, DKIM, and DMARC records to prevent spoofing, improve deliverability, and strengthen trust in every message your organisation sends. Your domain becomes more secure and more credible.
