OUR PROFESSIONAL SERVICES

For over two decades, our UK-based experts have helped businesses stay secure, confident, and productive with clear, practical guidance across cloud and Microsoft 365.

Our Core Services

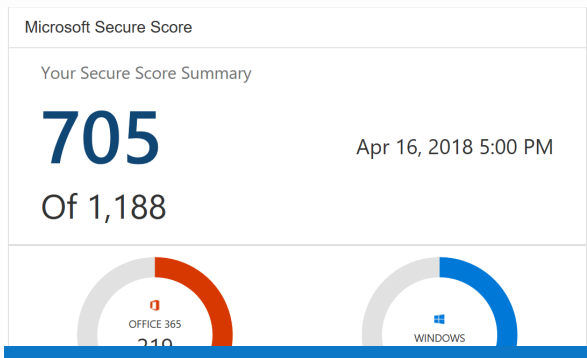

These services follow a defined delivery process and are designed for common business needs. Each service has clear upfront pricing, giving you confidence in what's included before work begins.

Microsoft 365 Security Review

Take control of your organisation's security with a thorough assessment of your Microsoft 365 environment. We analyse admin roles, user permissions, guest access, and backup readiness to uncover hidden vulnerabilities and strengthen your defence. This review ensures only the right people have the right access, and that your critical data remains protected and recoverable.

£250 + £10/user (ex VAT)

Secure Score Assessment & Action Plan

Get a clear, simplified view of your current Microsoft 365 security posture. Our Secure Score review highlights strengths, exposes weak points, and delivers a prioritised action plan tailored to your business. You'll receive practical, achievable recommendations designed to elevate your protection and reduce risk across your entire environment.

£150 + £10/user (ex VAT)

MFA & Legacy Authentication

Modernise your authentication approach to dramatically reduce account-related risks. We help you enable robust multi-factor authentication and remove outdated legacy sign-in methods that attackers commonly exploit. The result: safer, more resilient user accounts and a more secure identity foundation for your business.

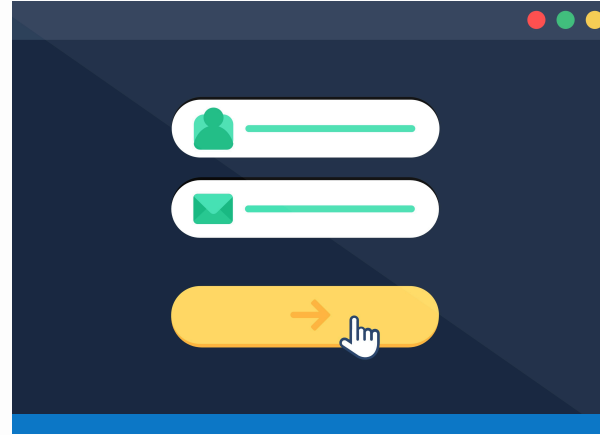

£100 + £10/user (ex VAT)

Anti-Spam & Anti-Phishing Assessment

Strengthen your frontline email security with fully optimised anti-phishing and anti-spam protection. Using the best of Office 365, Defender, and FutureSpam, we build robust, modern policies that block suspicious messages, reduce user risk, and safeguard your organisation against evolving threats.

£100 (ex VAT)

Email Authentication Setup (SPF, DKIM, DMARC)

Protect your business and ensure your emails reach customers with confidence. We implement industry-standard SPF, DKIM, and DMARC records to prevent spoofing, improve deliverability, and strengthen trust in every message your organisation sends. Your domain becomes more secure and more credible.

£50 (ex VAT)

Remote Support Sessions

Expert assistance whenever you need it. With over two decades of hands-on experience, our team supports everything from Microsoft 365 setup and configuration through to Outlook fixes, troubleshooting, and day-to-day issues that slow your users down. Whether it's a simple adjustment or a complex problem, we're here to help keep your business running smoothly from the small tasks all the way to the bigger challenges.

From £50 (ex VAT)

Not seeing the service you need? No problem – *get in touch* and our team will be happy to help.

Consultancy & Specialist Services

These services typically require additional time, specialist expertise, and sometimes scoping to understand your requirements and setup before we can confirm pricing.

Conditional Access Baseline Configuration

Strengthen your identity security with intelligent access controls tailored to your organisation. We implement baseline Conditional Access policies to enforce multi-factor authentication, protect users, and reduce unauthorised access risks, creating a more secure Microsoft 365 environment without impacting productivity.

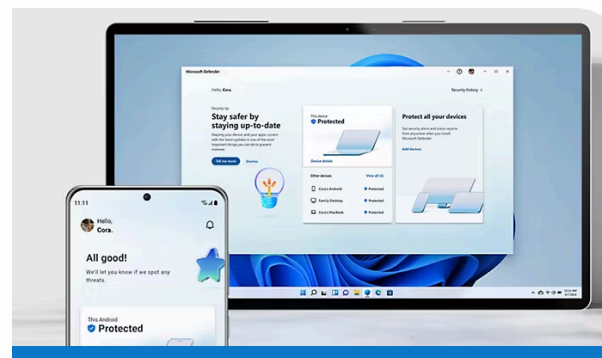

£100 + £10/user (ex VAT)

Cloud-Based Email Security Configuration

Protect your organisation from evolving email threats with modern, cloud-based security controls. We configure advanced protection policies and DNS records to block malicious emails, reduce risk, and improve overall email hygiene, keeping communication secure and reliable.

£50 (ex VAT)

Microsoft Defender for Business / Endpoint Setup & Configuration

Secure your devices with enterprise-grade endpoint protection. We deploy and configure Microsoft Defender to deliver threat detection, attack surface reduction, and continuous protection, ensuring your endpoints are actively defended against modern cyber threats.

£50 per device (ex VAT)

Intune Device Management (Consultation & Setup)

Take control of your devices with a tailored Intune setup. We provide consultation, configuration, and policy implementation to establish a secure and manageable environment, giving you full visibility, control, and compliance across your organisation.

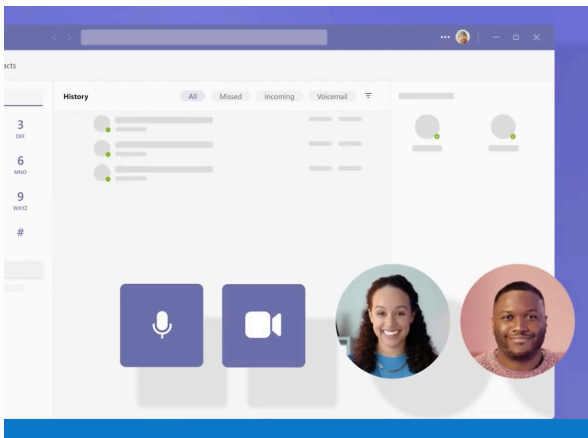

£100 + £10/user (ex VAT)

BitLocker & Device Encryption Rollout

Protect sensitive business data with full disk encryption across supported devices. We implement BitLocker policies aligned with cyber security best practices, reducing the risk of data exposure from lost or stolen devices.

£100 per device (ex VAT)

Teams Phone Configuration & Setup

Enable modern business calling with Microsoft Teams Phone. We configure calling policies, number assignment, and system setup for a seamless communication experience, delivering a fully integrated and reliable phone system.

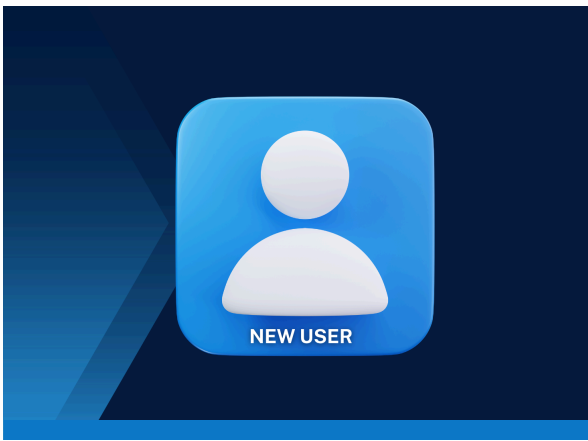

£100 + £10/user (ex VAT)

Microsoft 365 Backup Setup (Acronis)

Safeguard your Microsoft 365 data with secure backup solutions. We configure Acronis to protect your emails, files, and collaboration data beyond native retention, ensuring your business-critical data is always recoverable.

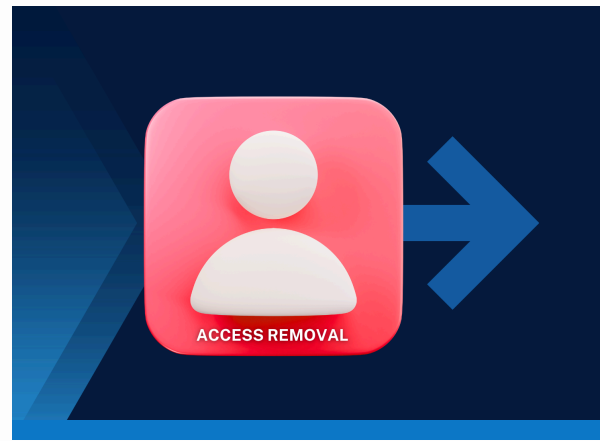

£100 (ex VAT)

New User Onboarding Configuration

Ensure every new starter is set up quickly, securely, and consistently. We configure accounts, permissions, and access so users can begin working immediately, creating a smooth and professional onboarding experience.

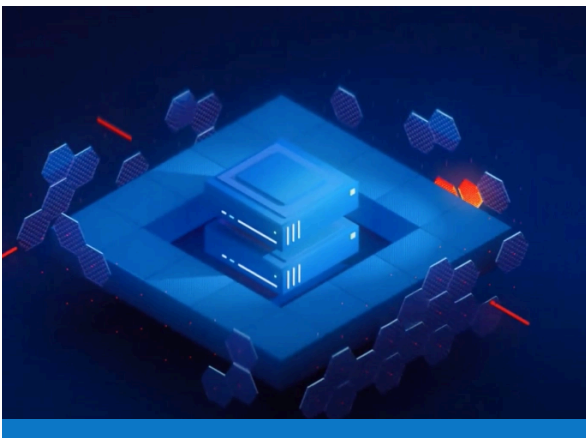

£100 + £10/user (ex VAT)

User Offboarding & Access Removal

Maintain security and control when users leave your organisation. We handle account deactivation, access removal, and data considerations to reduce risk, ensuring your environment remains protected at all times.

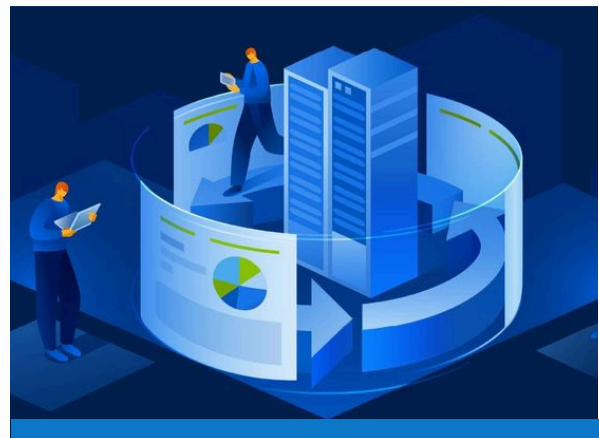

£100 + £10/user (ex VAT)

Endpoint Backup Setup (Acronis)

Ensure critical device data is protected with endpoint-level backup solutions. We configure Acronis backups tailored to your environment and business needs, minimising disruption and enabling fast recovery from data loss.

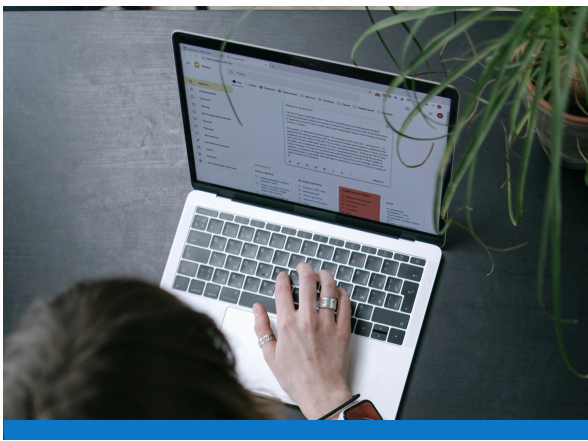

POA – This service requires a short scoping call

Acronis Backup Architecture Assessment

Review and optimise your backup strategy to ensure it is secure, efficient, and scalable. We assess your current setup and provide clear recommendations, giving you confidence in a reliable, future-proof solution.

POA – This service requires a short scoping call

Cloud-Based Email Migration

Seamlessly migrate your email systems to the cloud with minimal disruption. We manage planning, data transfer, and validation to ensure a smooth transition, keeping your business running throughout the process.

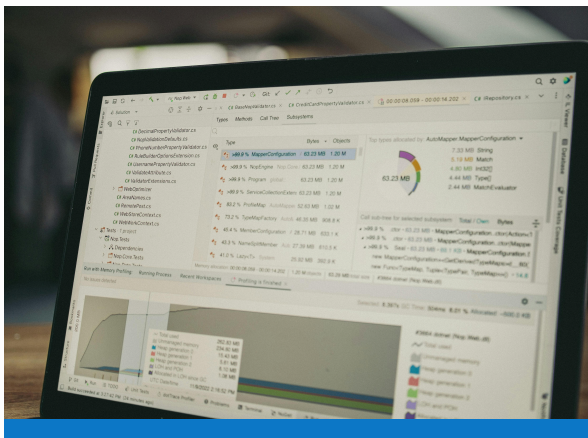

POA – This service requires a short scoping call

Microsoft 365 Tenant Migrations

Move your organisation between Microsoft 365 tenants securely and efficiently. We handle identity, data, and service migration with minimal downtime, ensuring a controlled and seamless transition.

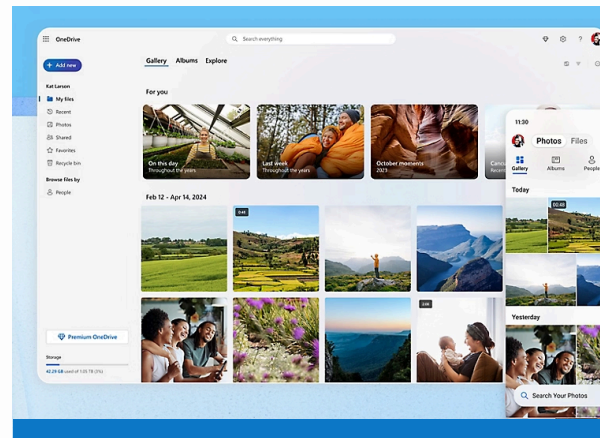

POA – This service requires a short scoping call

Tenant-to-Tenant Migrations

Complete separation or consolidation of Microsoft 365 environments handled with precision and care. We ensure data integrity and continuity throughout, reducing risk during complex migrations.

POA – This service requires a short scoping call

OneDrive User Data Migrations

Migrate user data securely while maintaining structure, permissions, and accessibility, ensuring everything remains organised and accessible without disruption.

POA – This service requires a short scoping call

Website Migrations (Configuration Dependent)

Move your website infrastructure with careful planning and execution to minimise downtime and ensure continuity, keeping your online presence stable throughout the transition.

POA – This service requires a short scoping call

Intune Full Rollout Programme

Deliver a complete Intune deployment including device enrolment, compliance policies, application deployment, and security configuration, creating a fully managed and secure device environment.

POA – This service requires a short scoping call

Cyber Essentials Readiness Assessment

Prepare your organisation for Cyber Essentials certification with a full security review and gap analysis, providing clear, actionable steps towards compliance.
